**TRANSPORTATION SECURITY ADMINISTRATION
PQR-LINZB9-P-LINZB9-001-1 – INTEGRATED LOGISTICS SUPPORT (“ILS”) SERVICES FOR
PASSENGER SCREENING PROGRAM/AIRPORT CHECKPOINT SECURITY EQUIPMENT**

[NAME] (the “Applicant”) provides to the Transportation Security Administration (“TSA”) Integrated Logistics Support (“ILS”) Services for Passenger Screening Program/Airport Checkpoint Security Equipment (the “Technology”) consistent with maintenance and technical services that ensure screening equipment installed throughout the United States, including advanced imaging technology, advanced technology, explosive trace detectors, cabinet X-ray systems, enhanced metal detectors, and explosive detection systems (collectively “screening systems”), function properly and are available to detect threat items. The screening systems typically protect airports and other transportation facilities against the threats posed by weapons, explosives, and other dangerous items. The ILS Services, which include corrective and preventive maintenance, support services (for example, spare parts supply, equipment testing, and calibration of screening systems), and other duties specified under the requirements outlined in the TSA’s ILS Contract Number TBD (Solicitation No. HSTS04-17-R-CT3014) are performed in strict conformance with manufacturer and customer requirements by specially trained personnel.
